

NEWS FROM THE LOWER POTOMAC.

OUR BUDD'S FERRY CORRESPONDENCE.
Budd's Ferry, Md., Nov. 2, 1861.

From the Rebel Batteries—Attack on the Rebel Steamer George P. Putnam. The Rebel Steamer George P. Putnam, which was captured by the Union forces, is now being used by the rebels. It is a small steamer, and is being used to transport supplies and troops. The rebels are using it to move supplies from the Potomac River to the interior. The Union forces are trying to prevent this, but the rebels are using the steamer to move supplies to the interior.

Within a day or two the numerous salutes have remained unanswered. Day before yesterday the first thundering answer went over from this point. Early on the afternoon of Thursday some of Captain Doubleday's ten pound rifled Parrot guns, which were placed in an excellent position on the beach, near Budd's house, opened fire on the rebel steamer George P. Putnam, which, with the two captured schooners, Fairfax and Mary Virginia, has been shut up for some time in Quantico creek, the mouth of which is opposite this place. Forty or fifty shots were fired from our battery, and several are believed to have found their way into the rebel steamer. The batteries on the Virginia shore returned the fire, but did not do a particle of damage to us. General Hooker, commander of the division, was present while the firing was going on. The occasion was one of lively interest, although none were killed or wounded on either side. Yesterday afternoon the attack on the rebel steamer was resumed, when a few guns were discharged. Her hull is entirely hidden by the smoke of the Quantico creek. The rebels were fired with remarkable accuracy, and it is believed that much damage was done to the steamer. The machinery of the steamer is said to be disabled. The rebels have answered the fire of our guns, but without effect. During the afternoon much amusement was afforded some of our soldiers by witnessing the fruitless efforts of the rebel batteries to hit two schooners which were passing down the river. In the morning four small boats had drawn the fire of the batteries upon them, and were fired at by the batteries. The boats were fired at by the batteries, and the boats were fired at by the batteries. The boats were fired at by the batteries, and the boats were fired at by the batteries.

Although the navigation of the Potomac is practically closed by the batteries at Shipping Point, Quantico creek, and the batteries at the mouth of the Potomac, the rebels are still using the river to transport supplies and troops. The Union forces are trying to prevent this, but the rebels are using the river to transport supplies and troops. The Union forces are trying to prevent this, but the rebels are using the river to transport supplies and troops.

The blockade of the Potomac is still a subject of great interest. It seems strange to a person looking at the Potomac from the mouth of the river, to see the Potomac so completely closed by the batteries. The Potomac is a large river, and it is strange to see it so completely closed by the batteries. The Potomac is a large river, and it is strange to see it so completely closed by the batteries.

We have received advices from Richmond to the 25th ult. The papers to that date give the following interesting extracts—

THE REBEL MINISTERS SELL AND MASON.
By this time our old representatives abroad, Messrs. Mason and Seward, are pretty well over the bridge. They have been sent to the lower Potomac without much practical effect, and we may hear of their return in the near future. The rebels are using them to transport supplies and troops. The Union forces are trying to prevent this, but the rebels are using them to transport supplies and troops.

OBITUARY.

Death of Sir James Graham.
Our English allies by the Persian annexation to the demerit of Sir James Graham, Bart., M. P., at his death, Northey, near Carlisle, county of Cumberland. The deceased was eldest son of the first baronet by Lady Catherine Stewart, daughter of the seventh Earl of Argyll. He was born in 1790, and was consequently in his sixty-third year. His political career has extended over a period of more than forty years. He was of the same age and standing as Lord Russell—the year of his birth being 1792. The descendant of an ancient Scottish name, like many of the young whigs of that day, he was educated at Westminster school. From thence he went to Queen's College, Cambridge, and very speedily earned upon public life. Travelling for his pleasure abroad, he was induced to become private secretary to Lord Melbourne, British Minister in Sicily, during the most critical period of the war. The young man in this, his first taste of the real world, was not disappointed. He was in London. He worked ten hours a day, and when Lord Melbourne returned to the Embassy he, although previously unacquainted with Mr. Graham, requested him to retain the post. It is said that in this capacity he performed several important services to the country; the best known, however, of which is one that has far outlasted him to his name in a contribution to the cause of the oppressed. We recall to the memory of the public the name of the young man who, in the year 1820, at the election which ensued on the death of George III., lost his life at the age of thirty. He was a young man of great talents, and he was a young man of great talents, and he was a young man of great talents.

BROOKLYN UNION RIFLES.
A meeting of the members of the above organization is called for Thursday afternoon, next, at three o'clock, at the office of Lucien Birdseye, Esq., 39 Wall street.

PRESENTATION OF COLORS TO THE SIXTY-FIRST REGIMENT.
A magnificent stand of colors will be presented to the Sixty-first regiment, Col. Cook, at Camp Harpers, Staten Island, at three o'clock to-day. The occasion will be quite an interesting one. The regiment is now ready for the field, and only await the order to "march." Colonel Cook appears to be a man admirably fitted for his position, and one on whom his men look with the greatest respect and esteem.
